Letter of recommendation

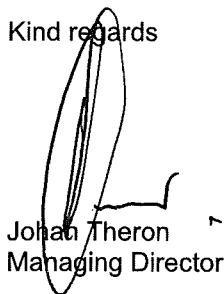

G4S Correction Services (Bloemfontein) (RF) (Pty) Ltd, Mangaung Correctional Centre as part of essential services would like to recommend Nanogistix (Pty) to any business who requires deep clean sanitation of premises.

In an effort to combat covid 19, to ensure the safety of all our customers and staff, Mangaung Correctional centre effectively uses Nano Deionized Aqua Solution containing Nano Ag+, anti-pathogenic solution surface protection to sanitize and protect all surfaces, This product comes with lasting protection using Nano partical tegnology, for up to 90 days.

We also observe that the application does not leave any residue or damaged treated surfaces and is ouderless.

We can aslo recommend Nanogitix antibaterial handsantizer which was made available to our staff. This product does not dry out hands as normal 70% alcohol based sanitizers, as it is waterbased non alcohol product, which is Nano Ag+ infused killing germs, bacteria and virusses and last up to 4 hours after application.

Kind regards

Johan Theron
Managing Director
